BLM studies (Igor K, Bernd, BJ) , May 2003

- 2 add. PC's (BDI) operational for IK

- K2 runs made for IR3, double density graphite
    500k injection ,   100k top, nominal n1+n2

- IK preparing MARS run, checking K2 data

- later:
    vary n1 or n2 for every jaw, run K2 and MARS again
    get partial fluences (from every jaw) at each BLM

    -> get the triangular response matrix for each case

    -> see …
