FLUKA Simulations of TCDQ halo loads

L. Sarchiapone, A. Ferrari, V. Vlachoudis

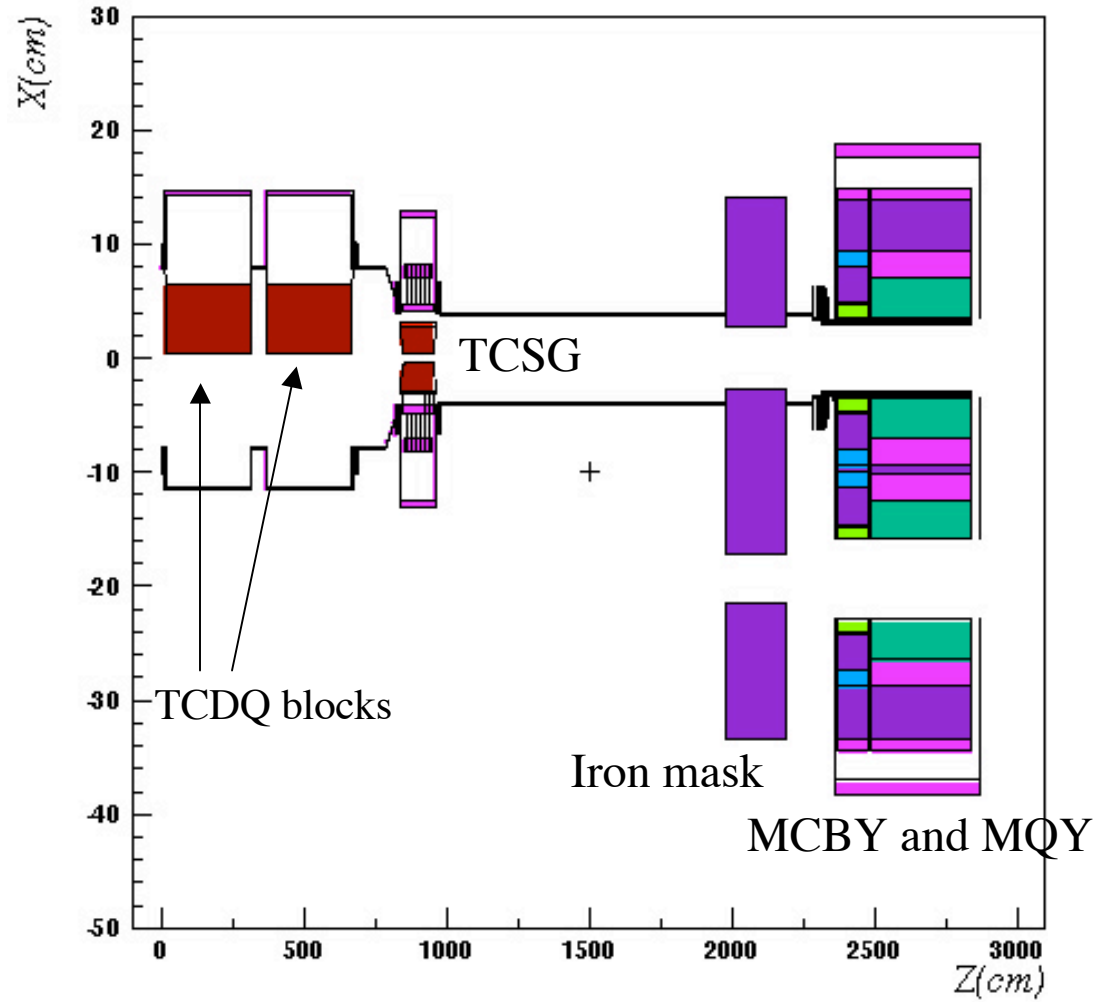

Summary

- Energy deposition on LHC dumping system elements, beam 2, Low β
- Peak energy and quench limits in quadrupole (MQY) and corrector dipole (MCBY)
- Magnetic field modulation in the MCBY

Geometry used for simulations

Input data, horizontal losses

Data provided by Thomas Weiler

	# of protons lost
TCDQA	1146
TCDQB	17
TCSG	720
Total	1883

Input data, vertical losses

Data provided by Thomas Weiler

	# of protons lost
TCDQA	757
TCDQB	11
TCSG	229
Total	997

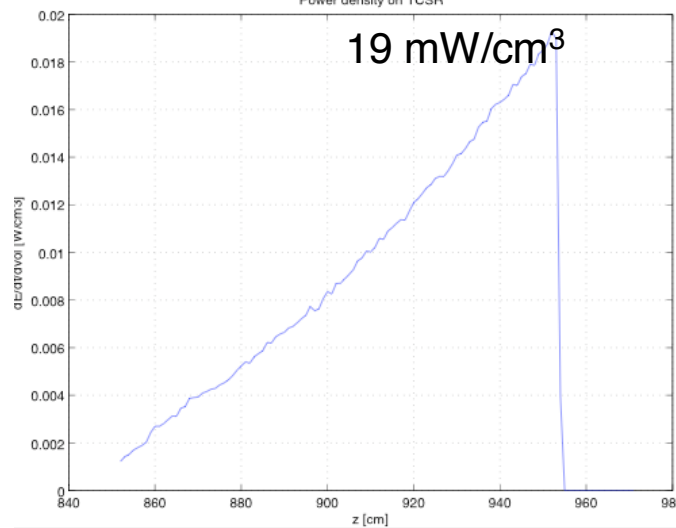

- ❑ 20,000 p⁺ followed in 4 runs
- ❑ Magnetic field **on**, in MCBY and MQY (sensitivity to the MCBY mag. field has been studied)
- ❑ Cartesian binning chosen for each element, with $\Delta x = \Delta y = 1\text{mm}$ and $\Delta z = 2\text{cm}$.
- ❑ Results in $\text{GeV}/\text{cm}^3/\text{p}$ converted to W/cm^3
- ❑ $5.11 \cdot 10^6$ particles absorbed in SixTrack simulations,
- ❑ Beam life time of **0.2 h** at nominal LHC intensity assumed
- ❑ Results scaled to **$1.65 \cdot 10^8$ p/s** lost on TCDQ/TCS

MCBY Coil

Localised deposition:
2.3 mW/cm³
Quench: 5 mW/cm³

Total power deposition in
the MCBY coil: ~ 2.5 W

Quench --> 20 W

Localised deposition:
3.1 mW/cm³

Quench: 5 mW/cm³

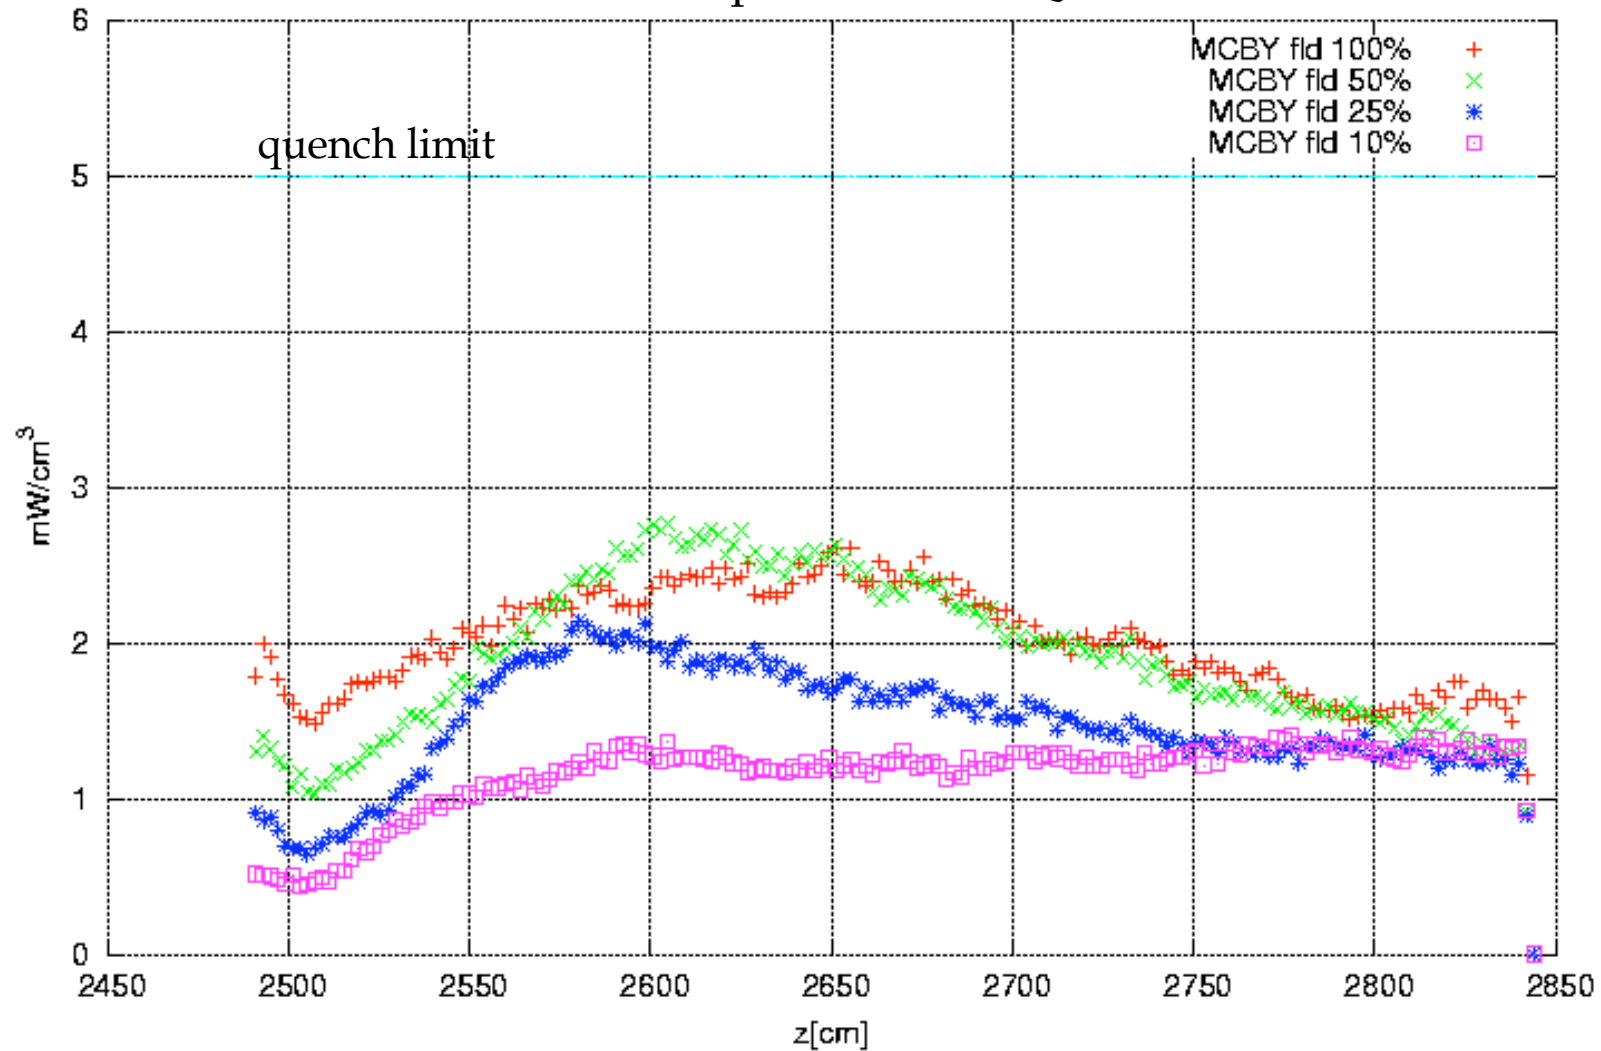

Total power deposition in
the MQY coil: ~ 9.5 W

Quench --> 20 W

MCBY field 100% --> ~2 T

- At the assumed loss rate of $1.65 \cdot 10^8$ p/s on TCDQ/TCSG the maximum power deposition on TCDQ (diluter) and TCSG (secondary collimator) is 60 mW/cm^3 and 22 mW/cm^3 respectively.
- The power deposited on the quadrupole MQY and the sensitivity to the magnetic field in the corrector dipole MCBY have been studied with the following result:
 - The power deposited on MQY with the a MCBY magnetic field of $\sim 2 \text{ T}$ (100%) is 3.1 mW/cm^3 , $<$ factor 2 under the quench limit (5 mW/cm^3);
 - Reducing the field intensity to 10%, the safety factor rises up to 4.
- The energy deposition doesn't change using as input the horizontal or vertical loss maps (results presented for "horizontal simulations" are also available for vertical).
